HAProxy - Install HAProxy Ubuntu

1. Kunjungi Website Resmi HAProxy https://www.haproxy.org/

2. Pilih versi yang diinginkan, contoh yang digunakan versi 3.0

Branch	Release date	End of life	Latest version	Changelog	Links
3.1-dev	~2024-Q4	2025-Q4 (dev » stable)	3.1-dev8	2024/09/18	git / web / dir / announce
3.0	~2024-05-29	**2029-Q2 (LTS)**	3.0.5	2024/09/19	git / web / dir / announce / bugs
2.9	2023-12-05	2025-Q1 (stable)	2.9.11	2024/09/19	git / web / dir / announce / bugs
2.8	2023-05-31	**2028-Q2 (LTS)**	2.8.11	2024/09/19	git / web / dir / announce / bugs
2.6	2022-05-31	**2027-Q2 (LTS)**	2.6.19	2024/09/19	git / web / dir / announce / bugs
2.4	2021-05-14	**2026-Q2 (critical fixes only)**	2.4.27	2024/06/18	git / web / dir / announce / bugs
2.2	2020-07-07	**2025-Q2 (critical fixes only)**	2.2.33	2024/04/05	git / web / dir / announce / bugs
Hide/Show unmaintained					

3. Memperbarui Sistem

```
apt update && apt upgrade -y
```

4. Tambah Repository, contoh disini menggunakan versi 3.0

```
add-apt-repository ppa:vbernat/haproxy-3.0
```

5. Update kembali

```
apt update
```

6. Install Haproxy

```
apt install haproxy -y
```

7. Check versi, pastikan sesuai dengan versi yang diinginkan.

```
haproxy -v
```

```
root@7cb591a64d35:/# haproxy -v
HAProxy version 3.0.5-1ppa1~noble 2024/09/21 - https://haproxy.org/
Status: long-term supported branch - will stop receiving fixes around Q2 2029.
Known bugs: http://www.haproxy.org/bugs/bugs-3.0.5.html
```

8. Start service HAproxy

```
systemctl restart haproxy
```

9. Mengaktifkan service otomatis setiap kali server dinyalakan.

```
systemctl enable haproxy
```

10. Selesai
